

Description: - Gyproc® fiber Tape

**Characteristics:** Gyproc® fiber tape is a pre-glued perforated tape designed to eliminate the need for a prebedding coat of jointing compound. It helps the applicator to conceal and create smooth finish without blisters or bubbles.

**Application:** - Gyproc® fiber tape allows the drywall finisher to simply stick the tape over a drywall joint and finish it using jointing compound. Gyproc recommends to use this only on vertical applications.

Gyproc Drywall Joint Tape		
Parameter		Specification
Yarn Size ( TEX)	Warp	(33x1)x2
	Weft	66
Density/25mm	Warp	9±0.5
	Weft	9±0.5
Adhesion ( S )		≥900
Width(mm)		50±1
Weight ( g/m2 )		65±5
Tensile Strength (N/50mm)		≥440
Content of Water (%)		≤0.5
Content of Glue (%)		≥25
